

# Secure Document Access Tool

# An Aras Innovator Based Solution for the Aerospace Industry

Using Aras Innovator IOM APIs, this solution enables fast access to CAD and critical manufacturing documents on the shop floor.

## Solution Architecture

AML-based high-speed search engine

Integration using Aras IOM APIs

Secure browser-based CAD viewing

Latest version retrieval logic

Resilient and scalable backend design

## Key Capabilities

Column-level filtering and wildcard search

Card-style and grid-based UI

Protected file access without download

Optimized memory and performance handling

Multi-language support

## Business Impact

Faster decision making on shop floor

Improved productivity and efficiency

Reduced PLM system load

Optimized license utilization

Zero downtime for CAD access
